

A collection of photographs from key viewpoints at the outer edge of Findon which illustrate the landscape setting of the village and identify the landscape impact of any development proposals at the edge of settlement.

The VIEWSHED has been undertaken to provide a landscape reference for the Updated Neighbourhood Plan and as a data base for Findon Parish Council planning committee to use when they consider the landscape impact of development proposals.

The published VIEWSHED references are the VP numbers and descriptions which are published on the Findon Parish Council and Findon Village websites as an available photographic data base of edge of settlement locations.

Site ref numbers from UNP Stage 1 Appraisals (as David Hares Findon LCA refs) and the **(HD- -)** ref numbers of UNP Reg 16 Housing site allocation policies have been added for clarity as an UNP Reg 16 Evidence Base Document.
